

..... President

Dear Mr.

The World Health Organization has caused the victimization of billions of people since two years due to the so-called measures such as masks, vaccines, pcr tests, hes codes, treatment protocols, bans, workplace closures, quarantine and autopsy bans imposed on all countries under the pretext of the Covid19 epidemic.

Rights and freedoms such as bodily integrity, the right to life, the material and spiritual existence of the person, as well as the right to education, work and travel, which were declared in the general assembly of the United Nations in 1948 and determined in the universal declaration of human rights, have been violated.

After the covid process that lasted for two years, this time WHO took decisions such as imposing obligations for vaccination and other measures and prepared a draft contract to compel all countries to implement them. This draft, which is within the scope of interference with the sovereignty of states, has been published in the press, which will be finalized in the coming months.

It is understood that the World Health Organization has taken unprecedented practices and decisions in the history of the world, under the name of "new world order - new normal - great reset", by abusing its international organization feature and being directed by a group of people, which will cause violations of rights against the human race.

For this reason, even if there is a real epidemic, we demand that the officials on behalf of the country be instructed not to sign the draft contract prepared by WHO, which is against the sovereignty of countries. Best Regards.
