

To the German Presidency

To the German Chancellery

To the German Foreign Ministry

To the German Ministry of Justice

Reiner Fuellmich was one of the first to realize that the Covid-19 plan constituted a crime against humanity.

He founded the Corona Research Committee, which aims to shed light on the actions of governments, public institutions and the medical community regarding the so-called pandemic.

He has fought for humanity with important work and activities in the field against Covid fraud.

He was imprisoned with a slander scenario and unfair trial because he exposed the Corona lies, PCR test and mRNA fraud.

The decision regarding Reiner Fuellmich has gone down in German legal history as a shameful document.

The decision is null and void in the eyes of humanity and must be immediately reversed and annulled.

The rights violations and mistreatment of Reiner Fuellmich, who is being held in the JVA Bremervörde prison, must end immediately.

Reiner Fuellmich must be released and this black mark on German legal history must be erased.

Kind regards
